279 Kayes Road Baringhup West, 3463

WELCOME TO 2026

Shane and Amber Baker, together with daughters Rory and Remi, welcome you to Booloola, our 810-hectare mixed farming operation on the rich volcanic soils of the Moolort Plains, nestled between Maldon and Maryborough. Farming has been part of the Baker family story for more than a century, and we are proud to continue building on that legacy.

Since the establishment of the Booloola White Suffolk Stud in 1998, our focus has remained clear: breeding productive, practical sheep that perform under commercial conditions. From selling just 35 rams in 2013 to presenting more than 250 rams in recent years, the continued growth of our sale is a testament to the confidence our clients place in our genetics.

Booloola operates as a diverse mixed farming enterprise incorporating stud and commercial sheep, cattle, broadacre cropping and irrigated hay production. Through the strategic use of grazing crops including canola, wheat and barley, we have been able to increase productivity across the farm while maintaining a strong focus on livestock performance.

Our breeding philosophy centres on producing functional, profitable sheep for Australian producers. We are committed to offering structurally correct, easy-care, grass-fed rams with the genetics, constitution and performance to add value to your flock and improve your bottom line.

We sincerely thank our returning clients for their ongoing support and extend a warm welcome to those joining us for the first time. We look forward to catching up with you at our 2026 sale.

PUSHING OUR GENETICS

Mature ewes are joined early January for a June lambing which over the past several years has resulted in lambing percentages over 170% lambs marked. Our elite ewes are embryo flushed in February and all retained ewe lambs are joined in March either naturally or by AI. A selection of ram lambs are used yearly within the stud which will then be offered with in this years on property sale.

We feel that it is really important to push our genetics to provide clients with the most profitable ram packages available. Our genetic aim has shifted from solely visual to now a more balanced approach between structural/visual and data.

Clients' profitability remains the key driving factor at Booloola. Functional rams that produce lambs that can reach many different markets in a large range of environmental conditions and management systems is what we pride ourselves in offering.

Our focus has always been simple, breeding White Suffolk rams that deliver real performance, profitability and longevity for commercial and stud producers alike.

Our success has been built on two guiding principles: No Short Cuts and Client Profitability is Our Key Driver. Every breeding decision we make is centred around producing genetics that create lasting value for our clients because we believe our success is directly linked to yours.

GENOMICALLY TESTED

In 2026 and beyond, every Booloola bred ram offered for sale will be genomically tested.

After careful consideration, we made the decision to invest in genomics because it aligns with the values that have shaped our stud from the beginning. By combining comprehensive raw data collection with genomic testing, we can provide clients with greater confidence in the information behind every ram and deliver the highest possible data accuracy.

Genomic testing enhances the accuracy of key profit-driving traits, including Weaning Weight (WWT), Post Weaning Weight (PWWT), Post Weaning Eye Muscle Depth (PEMD) and Intramuscular Fat (IMF), while also strengthening the reliability of important traits such as Birth Weight, Parentage and muscle and fat scan data.

This provides clients with more accurate breeding information, allowing for greater confidence when selecting genetics to improve flock productivity and long-term profitability.

Our 2026 sale team represents generations of disciplined breeding,

FAMILY OPERATED

As a family-operated stud, we understand that purchasing a ram is more than a sale-day decision, it's an investment in your breeding program. That is why our commitment extends well beyond the auction ring. We pride ourselves on building genuine, long-term relationships with our clients through honest advice, ongoing support and after-sale service. We are always available to discuss breeding objectives, ram selection, performance or any questions that arise throughout the year.

We don't see our clients as customers for a day, we see them as partners for the future. Your success is our success, and together we can continue to build more productive, profitable sheep enterprises.

Whether you are a long-standing supporter or attending your first Booloola Ram Sale, we look forward to welcoming you and helping you select genetics that will make a lasting impact on your flock.
We sincerely thank all of our clients for their continued trust and support and look forward to seeing you at our 2026 White Suffolk Ram Sale.

SALE DAY

6th October, 2026

Booloola White Suffolks Sale Day Details

250 Lots: 20 Specially Selected Rams and 230 Flock Rams

Held on property at '279 Kayes Rd, Baringhup West, Victoria, 3463'

Roast Lamb Rolls & BBQ lunch supplied from 12pm

Purchased sheep may be held on property awaiting delivery following the sale.

4% rebate to agents registering 24 hrs. prior to sale.

Agents are required to be in attendance to receive the rebate.

Booloola reserves the right to have semen collected from any ram sold for within flock use only.

All rams purchased for stud use must meet minimum reserve of $4000 to be registered.

Inspection from 11am on sale day or prior arrangement contact:

SIRES

Booloola sires are selected on structural correctness, balanced data (post weaning weight growth positive fats, high muscle without losing sight of the future profit drivers such as shear force and IMF), that matches the animals physical attributes.

Percentile highlights indicate where an animal sits in relation to other animals in the anaylsis from the current year drop for top and bottom percentiles. This shows where animals rank for that trait within the analysis. Animals that rank in the top 1%, 5%, 10% and 20% percentile for a particular trait or index will be marked using red, blue and green respecitvely.
